

## Role Profile

Rendel, an Ingérop Group company, is an international, multidisciplinary design and engineering consultancy, headquartered in London with offices in Birmingham, Bristol and Sydney, Australia. We provide client-focused engineering and technical solutions on major engineering construction projects worldwide in the infrastructure, energy and industry sectors, and working with contractors, international monetary funds and developers.

We are involved in schemes at all stages of the life cycle including development; planning; detailed design; independent design checking; value engineering; technical advisory; and construction supervision services. Rendel's origins date back to 1838, making us one of the oldest civil engineering consultants in the UK.

We are proud of our global track record, providing technical solutions for many complex infrastructure, energy and industry projects. Our experience includes bridges, ground engineering, highways, ports, industry, energy, rail systems and tunnels. Current major projects include HS2 rail and Hinkley Point C nuclear power station in the UK; Padma Bridge in Bangladesh; the Kampala-Jinja Expressway in Uganda; Hay Point Coal Terminal Berth 2 in Australia; and the Port of Abidjan in Côte d'Ivoire.

<b>JOB TITLE</b>	Principal Structural Engineer
<b>LOCATION</b>	London
<b>TRAVEL</b>	A willingness to travel is essential
<b>MINIMUM REQUIREMENTS</b>	<ul style="list-style-type: none"> <li>▪ Chartered Engineer through a recognised institution</li> <li>▪ Structural Engineering Consultancy experience on large, complex infrastructure projects</li> </ul>

- Undertake other reasonable duties as requested

## PERSON SPECIFICATION

### KEY EXPERIENCE AND QUALIFICATIONS

- Degree qualified Civil Engineer; post graduate qualifications would be beneficial
- Near Chartered (actively progressing application)/Chartered in a relevant discipline (ICE, IStructE)
- Working knowledge of structural processes and design, with a particular emphasis on data interpretation, design & analysis, construction and advanced numerical modelling
- Experience in concrete and steel design of heavy civils, infrastructure projects
- Extensive knowledge of Eurocodes, AASHTO and other national and international industry standards, contracts, methodologies, procedures and best practice.
- Experience of computer analysis of structures and design of structural elements in common materials i.e. steel, concrete, composite, fibre reinforced concrete and CFRP.
- Experience predominantly in large scale (c.£100m+), high profile infrastructure projects, for a range of UK and international Clients in various construction market sectors, including Design & Build projects.
- People management experience e.g. general employee welfare, carrying our appraisals, training and development, involvement in resourcing and recruitment activities

### COMPETENCIES

- **Technical:** Excellent skills and knowledge, able to provide clear direction and undertake tasks in a cogent manner while sharing their expertise
- **Communication:** Strong interpersonal skills; ability to communicate, listen and influence all levels of people effectively. Excellent reporting / writing and strong presentation skills; able to adapt technical message to audience
- **Critical Thinking:** Ability to think and act operationally and strategically, able to respond quickly to changing circumstances whilst maintaining a clear view of overall priorities. Ability to work well under pressure and ensure deadlines are met, whilst maintaining a high quality of work
- **Team:** Excellent team working skills; able to lead, contribute to and collaborate with multi-disciplinary teams in a matrix environment
- **Leadership:** Demonstrates high standards, involves the team and drives it to listen to, interpret and exceed client expectations. Strong coaching and mentoring skills to train, develop and give constructive feedback to other engineers and technicians
- **Project Management:** Results orientated with a strong drive to deliver success, a proven ability to manage medium/large budgets, projects and programmes of work to agreed targets and priorities. Able to clearly communicate objectives and make timely, rational decisions with the information available and learn from successes and failures

### IT SKILLS

- Knowledge and experience in structural analysis/finite element software such as LUSAS, MIDAS etc
- Excellent Microsoft Office abilities (particularly Excel)
- Familiarity with managing projects involving 3D BIM

### PERSONAL STYLE AND BEHAVIOUR

- Self-motivated and committed, with a high degree of integrity
- A team player who seeks to positively contribute to the working group with a collaborative attitude
- Convincing in terms of a capacity to translate objectives into effective practical steps

- Able to perform effectively within changing environments; demonstrates willingness and flexibility of availability to meet business needs
- Demonstrates a strong need to achieve, setting high standards for self and others. Committed to the value of own role, takes initiative and focuses on improving business performance
- Commitment to own personal development
